ACKNOWLEDGEMENT

(Center, Cap, Times New Roman, Size 14, Bold)

Alhamdulillah, praise be to Allah for giving me enough time to complete this Practical Training.

First and foremost, I would like to express my gratitude to my industry supervisor, Mr. Muhamad Bin Abdullah and academic supervisor, Mdm. Nora Anak Nick for their guidance, advice, co-operation, encouragement and useful ideas in completing this report.

Last but not least, my family .

(Times New Roman, justify aligned, size 12, 1.5-spacing between lines, double-spacing between paragraphs, no indentation for a new paragraph)

To start using the Practical Training Report template,

- Download the Practical Training Report Template file (in **.dotx** format) from the Google Drive folder.
- Open the Practical Training Report Template file (in **.dotx** format) in Microsoft Office Word only.
- Save the file using a suitable name at suitable location on your computer (e.g. the desktop) and the template is ready for use.

ABSTRACT

Abstract is a summary of the whole Practical Training report. The abstract should have summary of every chapter in the report. This abstract then need to be translated to Bahasa Melayu in the next section (Abstrak). The abstract should not exceed 500 words and is written in one (1) paragraph only. Generally, the contents of abstract in English tend to have less words than the contents for Abstrak in Bahasa Melayu. **ABSTRACT SHOULD BE THE LAST THING TO BE WRITTEN IN EVERY REPORT.** Starting to write a report from abstract means that the report will never finish.

ABSTRAK

Abstrak ialah satu bentuk penulisan yang merumuskan keseluruhan laporan Latihan Praktik ini dalam Bahasa Melayu. Abstrak perlu mengandungi rumusan dari setiap bab dalam laporan ini. Abstrak ini merupakan terjemahan kepada kandungan dalam bahagian sebelum ini, iaitu Abstract dalam Bahasa Inggeris. Panjang abstrak haruslah tidak melebihi 500 patah perkataan, dan ditulis dalam satu (1) perenggan sahaja. Secara umumnya, kandungan abstrak dalam Bahasa Melayu akan lebih panjang dari kandungan abstract dalam Bahasa Inggeris.

CHAPTER 1: INTRODUCTION

1.1. Introduction

This Practical Training Guideline serves as a guide for Practical Training students to correctly format their Practical Training Report. Many students face difficulties in properly apply the desired formatting as provided in the previous Practical Training Guideline, thus an updated Guideline and Template is created to relieve the confusion of proper Practical Training Report formats.

From 2021 onwards (until a new guideline/template is updated) this Practical Training Report Guideline in **.pdf** and Practical Training Report Template in **.dotx** formats are provided to students and supervisors.

This Practical Training Report Guideline and the Practical Training Report Template are already formatted based on the formatting specifications to serve as reference for students when they are preparing their Practical Training Report.

To start your report,

- Download the Practical Training Report Template file (in **.dotx** format) from the Google Site for CSC339 UiTM Sarawak Branch (<https://sites.google.com/uitm.edu.my/sarawak-csc339>).
- Open the Practical Training Report Template file (in **.dotx** format) **in Microsoft Office Word only**.
- Save the file using a suitable name at suitable location on your computer (e.g. the desktop) and the template is ready for use.

1.2. Preparing Practical Training Report using the Template in Microsoft Office Word

The provided Practical Training Report Template in **.dotx** format make use of the Navigation Pane, Headings and Styles features available in Microsoft Office Word to help students with formatting texts and paragraphs in their Practical Training Report.

The provided Practical Training Report Template also make use of other automated features available in Microsoft Office Word, such as automatic Table of Content generation based on headings and subheadings, automatic List of Tables generation based on table captions, etc.

Students are advised to open the provided Practical Training Report Template in **.dotx** format using Microsoft Office Word. The **.dotx** format was developed, optimised and maintained by Microsoft to utilise all features available in Microsoft Office Word software. The use of other software (such as WPS Office) to open the **.dotx** file may cause some formatting issues as not all software can replicate all features and functionalities of Microsoft Office Word. All UiTM students are provided a Microsoft account to legally install and use all software in the Microsoft 365 suite, including Microsoft Office Word, Microsoft Office Excel and Microsoft PowerPoint.

1.2.1. Show Navigation Pane

Students can use the Navigation Pane to quickly navigate throughout their Practical Training Report based on the headings and subheadings. To display the Navigation Pane, as shown at the left side of Figure 1.1, tick the “Navigation Pane” checkbox under the View Tab of Microsoft Office Word. The headings and subheadings that appear in the Navigation Pane will also be listed in the Table of Contents when students update the table of content list.

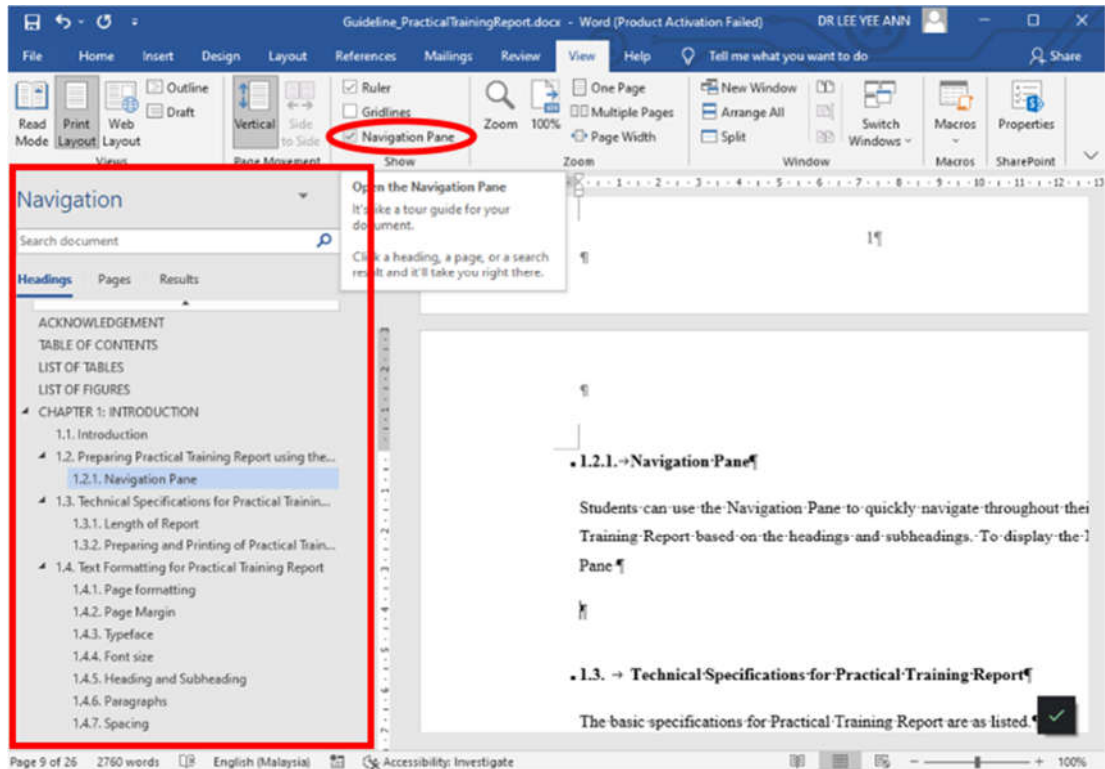

Figure 1.1 Navigation Pane.

1.2.2. Show Styles Pane

Students can use the Styles Pane to quickly change the format of the texts in their Practical Training Report. To display the Styles Pane, as shown at the right side of Figure 1.2, click the small arrow at the “Styles” group under the Home Tab of Microsoft Office Word.

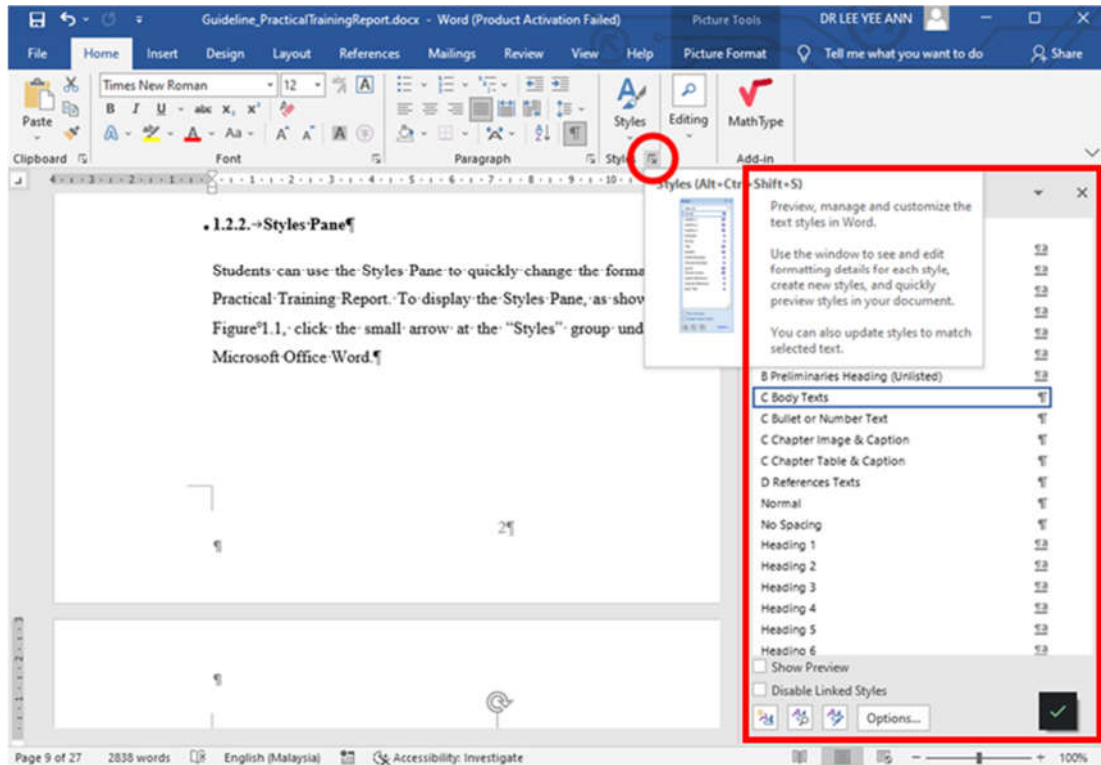

Figure 1.2 Styles Pane.

1.2.3. Show/Hide Formatting marks

To help with advanced formatting and layout tasks, use the show/hide formatting marks. Figure 1.3 shows how to show/hide the formatting marks in Microsoft Office Word.

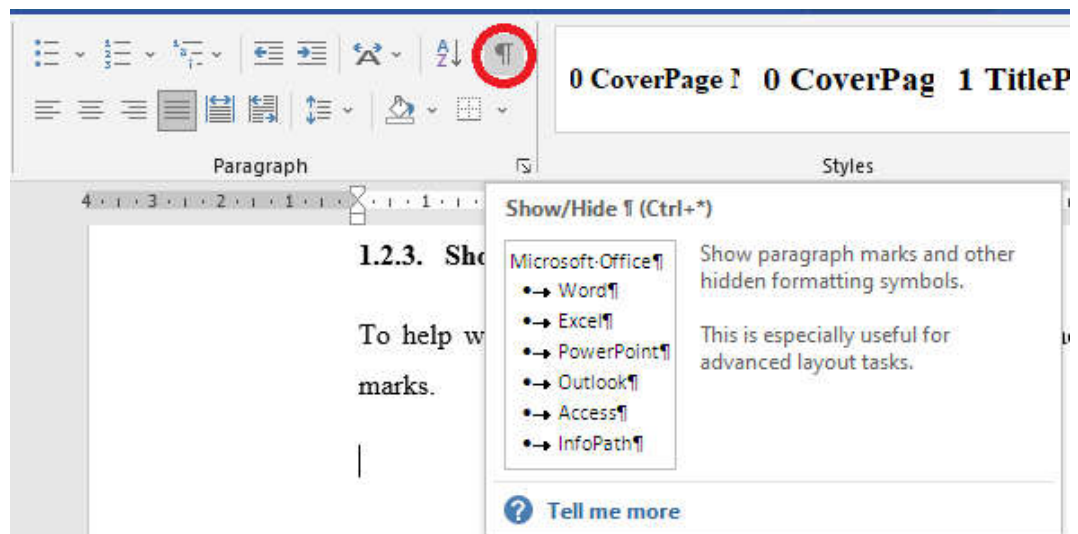

Figure 1.3 Show/Hide Formatting Mark.

CHAPTER 2: FORMATTING THE PRACTICAL TRAINING REPORT

2.1. Preparing and Printing of Practical Training Report

Microsoft Office Word should be used for preparing the Practical Training Report. The Practical_Training_Report_Template.dotx is provided to be used as the main template for students to prepare their Practical Training Report.

All final copies of the Practical Training Report should be printed using laser printer for quality printing.

2.2. Length of Report

As a general guideline, the Practical Training Report should not exceed 20,000 words, excluding appendices.

2.3. Page Setup

The page setup for the Practical Training Report should be of A4 size (210mm × 297mm), with portrait orientation.

2.3.1. Page Margin

Margin specifications are meant to facilitate binding and trimming. The stipulated margins for the Practical Training Report are

- Top: 3.0cm
- Bottom: 3.0cm
- Left: 4.0cm
- Right: 2.5cm

All information including the text headings, footnotes and illustrations should be within these margins.

2.4. Text Formatting for Practical Training Report

Students should prepare their Practical Training Report according to the formats specified in the Practical Training Report Guideline.

2.4.1. Typeface

The entire text of the Practical Training Report, including headings and page numbers, should be of the same typeface. **Times New Roman** should consistently be used throughout the Practical Training Report.

2.4.2. Font size

The normal texts in the Practical Training Report should be of size 12 points. The Practical Training Template will automatically apply these formatting when the “C Body Texts” style is applied from the Styles Pane. Texts should not be scripted or *italicised* except for

- Scientific names,
- Terms in different language, and
- Quotations.

Students may **bold** some words within the texts as **emphasis**.

2.4.3. Heading and Subheading

Headings and subheadings are subsections of the Practical Training Report. All Headings and subheadings should be numbered, except for the headings of the preliminaries and closing sections of the Practical Training Report

Headings of the preliminaries and closing sections of the Practical Training Report is not numbered. The text for Headings should be in ALL UPPERCASE, **bold** and font size of 14 points. The Practical Training Template will automatically apply these formatting when the “B Preliminaries Heading” style is applied from the Styles Pane.

Headings of the main body (chapters) of the Practical Training Report should be numbered as chapters, like “CHAPTER 1, CHAPTER 2, CHAPTER 3, ...”. The text for Headings should be in ALL UPPERCASE, **bold** and font size of 14 points. The Practical Training Template will automatically apply these formatting and number all chapters when the “Heading 1” style is applied from the Styles Pane.

Subheadings are subsections under a heading. Subheadings are mainly used in the main body (chapter) section of the report to subdivide a chapter into smaller subsections. The text for subheading should be in “Capitalise Each Word” case, **bold** and font size of 12 points. The Practical Training Template will automatically apply these formatting and number all chapters when the “Heading 2”, “Heading 3” or “Heading 4” style is applied from the Styles Pane.

2.4.4. Paragraphs

New paragraphs at the bottom of a page must have at least two (2) full lines of text; if not, it should begin on the next page. By default, Microsoft Office Word will automatically make sure that paragraphs at the bottom of a page have at least two (2) lines of text.

2.4.5. Spacing

Use 1.5-line spacing between lines and 2-line spacing between paragraphs. The following, however, should be single-spaced.

- Explanatory footnotes
- Quotations longer than three (3) lines in a block
- Reference or bibliography (except between entries)
- Multi-line captions (table and figure captions)

- Appendices, such as questionnaires, letters.

The Practical Training Template will automatically apply these spacings when the appropriate style is applied from the Styles Page.

2.4.6. Pagination

Pagination refers to the numbering of every page of the Practical Training Report.

Page numbers should be centred, about 2.0cm from the bottom edge of the page. The position of the page numbers should be consistent throughout the Practical Training Report. Page numbers must not be punctuated, bracketed, hyphenated nor accompanied by any decorative devices.

The pages of the preliminaries section (approval sheet, acknowledgement, table of contents, etc) should be numbered in consecutive lower case Roman numerals (i, ii, iii, iv, v, vi, ...).

All pages of the main body (chapter) and closing sections (references, appendices, etc.) should be numbered consecutively in Arabic numerals (1, 2, 3, 4, 5, 6, ...).

Each appendix should be identified separately using a capital letter (Appendix A, Appendix B, ...) on the top right-hand margin of the text. The pages of the Appendices should also be numbered consecutively.

No page numbers are required for

- Cover page
- Title page
- Separator sheets (e.g. separator preceding each Appendix)

The Practical Training Template already applied the page numbering formats.

2.4.7. Notes and footnotes

Footnotes, if at all necessary, should be kept to a minimum. The font size for notes and footnotes should be of size 8 points.

2.5. Tables and Table Captions

Tables must be properly centred on the page within the page margins specified in Section 2.3.1. Each table should have a reference number (in Arabic numeral) and a caption. The table number is used to identify the table throughout the Practical Training Report and so that the table caption appears in the List of Tables section. The table caption should describe the purpose of the table.

Table numbering should be in the format of Table 1.1, Table 1.2, etc. in Chapter 1; Table 2.1, Table 2.2, etc. in Chapter 2; and so on. The first number indicates the chapter in the main body (chapter), while the second number is consecutive numbers that should restart at 1 for every chapter. Tables in Appendices does not need to be numbered, but must have table caption.

The table number and caption should appear above the table. If a table is taken from another source, the reference must be cited properly at the bottom of the table.

Table 2.1 shows an example of how a table and table caption should appear in the Practical Training Report.

2.6. Figures and Figure Captions

Figures may be illustrations, graphs, maps, charts, diagrams, photos, etc. In fact, anything that is neither scripted nor table. A figure should not normally extend beyond one (1) page.

Figures must be properly centred on the page within the page margins specified in Section 2.3.1. Each figure should have a reference number (in Arabic numeral) and a caption. The figure number is used to identify the figure throughout the Practical

Training Report and so that the figure caption appears in the List of Figures section. The figure caption should describe the purpose of the figure.

Figure numbering should be in the format of Figure 1.1, Figure 1.2, etc. in Chapter 1; Figure 2.1, Figure 2.2, etc. in Chapter 2; and so on. The first number indicates the chapter in the main body (chapter), while the second number is consecutive numbers that should restart at 1 for every chapter. Figure in Appendices does not need to be numbered, but must have figure caption.

The figure number and caption are placed below the table. If a figure is taken from another source, the reference must be cited properly as part of the figure caption.

Figure 1.1 and Figure 1.2 shows an example of how a figure and figure caption should appear in the Practical Training Report.

2.7. Equations and Equation Numberings

Equations should be inserted using Microsoft Equation Editor. Every equation should be numbered according to the chapter where it appears. Equation numbering should be in the format of (1.1), (1.2), etc. in Chapter 1; (2.1), (2.2), etc. in Chapter 2; and so on. The first number indicates the chapter in the main body (chapter), while the second number is consecutive numbers that should restart at 1 for every chapter. Equations in Appendices does not need to be numbered, unless necessary.

The equation should be centred on the line and numbered at the right side of the line. Equation (2.1) shows an example of how an equation and equation numbering should appear in the Practical Training Report.

$$y = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a} \quad (2.1)$$

Inserting equations and equation numbers with the correct formatting is tricky. The best approach is to use table with invisible borders so that the equation is centred on the page but still has the equation number at the right edge of the line.

2.8. Summary

Table 2.1 summarises the main formatting to be applied for the Practical Training Report.

Table 2.1 Formatting of Practical Training Report

No.	Item	Format
1.	Length of report	Should not exceed 20,000 words
2.	Page size	A4 (210mm × 297mm)
3.	Page margin	Top: 3.0cm Bottom: 3.0cm Left: 4.0cm Right: 2.5cm
4.	Typeface	Typeface used in the report should be consistent throughout the whole report. Times New Roman should be consistently used throughout the report.
5.	Font size	Normal text: 12 points Main heading: 14 points, bold , UPPERCASE Subheading: 12 points, bold , Title Case
6.	Spacing	1.5-line spacing between lines and 2-line spacing between paragraphs. 1-line spacing for situations specified in section 2.4.5
7.	Page number	Centred, about 2.0cm from the bottom edge of the page. No page number for Cover page and Title page. Page number in Roman numerals (i, ii, iii, ...) for preliminaries section. Page number in Arabic numerals (1, 2, 3, ...) for main body (chapter) and closing sections.

CHAPTER 3: SECTIONS OF PRACTICAL TRAINING REPORT

The Practical Training Report is comprised of several sections, namely Cover Page, Title Page, Preliminaries, Main body (Chapters), References and Appendix.

3.1. Cover Page

The cover page of this Practical Training Report shows a coloured cover page image for Faculty of Computer and Mathematical Sciences, Universiti Teknologi MARA (UiTM).

At the middle of the cover page is the area where the Practical Training Report title should be. The details below are printed in UPPERCASE in this page.

- Title of the report (PRACTICAL TRAINING REPORT)
- Organisation attached (Name of the organisation)
- Student name
- Student ID

These should be centred, **bold**, font size of 14 points for the first line, but font size of 12 points for the remaining lines. This cover page is not paginated (does not has page number)

Refer to the front page of this guideline/template for correct formatting of the cover page.

3.2. Title Page

The title page is where the complete title of the Practical Training Report is shown. This page should contain the following details.

- University name (UNIVERSITI TEKNOLOGI MARA)
- Title of the report (PRACTICAL TRAINING REPORT)

- Full name of the organisation
- Full address of the organisation
- Start and end dates of practical training
- Student name
- Student ID
- The degree for which the report is submitted (Diploma in Computer Science)
- Name of Faculty (Faculty of Computer and Mathematical Sciences)
- Month and year in which the report is submitted

The university name and report title should be formatted as centre aligned, **bold**, UPPERCASE, font size of 18 points, and single-line spacing. The remaining details should be formatted as centre aligned, **bold**, font size of 14 points, and single-line spacing. In addition, the student name should be in UPPERCASE.

This title page is paginated in roman numeral as ‘i’, but this page number is not displayed.

Refer to the title page of this guideline/template for correct formatting of the title page.

3.3. Preliminaries

The preliminaries section differs from the main body (Chapters) section of the report mainly at the page numbering. The preliminaries section (including the title page) is paginated in Roman numeral (ii, iii, iv, v, vi...).

The preliminaries section contains the followings.

3.3.1. Approval Page

The approval page shows the name of the Academic Supervisor that approved the Practical Training Report. This approval page is paginated in roman numeral as ‘ii’.

Refer to the approval page of this guideline/template for correct formatting.

3.3.2. Acknowledgement

The acknowledgement page is for students to dedicate their gratitude and appreciations to any person, entity or organisation in recognition of any special assistance rendered to them throughout their Practical Training.

The texts follow the general formatting for texts and paragraphs specified in Section 2.4 while the heading for this page follow the formatting as in Section 2.4.3. This acknowledgement page is paginated in roman numeral consecutively from the preceding page.

3.3.3. Table of Contents

The titles of parts, chapters or sections and their principal subdivisions should be listed in the Table of Contents and must be worded exactly as they appear in the body of the Practical Training Report. It is advisable to use numbers for heading (e.g. 5), subheadings (e.g. 5.1), and third level subheading (e.g. 5.1.8). For further subdivisions of headings, small letters within parent report (e.g. 5.1.8 [e]) may be used. Such numbering system could show, at a glance, the main and subordinate headings and their relationship with one another. There should not be more than three (3) digits in the numbering system. This table of contents is paginated in roman numeral consecutively from the preceding page.

If student use the provided Practical Training Report Template file (in **.dotx** format) from CSC339 Google Site, the Table of Content is automated, and will update accordingly.

3.3.3.1. List of Tables

The list of tables must use exactly the same numbers and captions that appear above the tables in the texts. This list of tables is paginated in roman numeral consecutively from the preceding page.

If student use the provided Practical Training Report Template file (in **.dotx** format) from CSC339 Google Site, the List of Tables is automated, and will update accordingly.

3.3.3.2. List of Figures

The list of figures must use exactly the same numbers and captions that appear below the figures in the texts. This list of figures is paginated in roman numeral consecutively from the preceding page.

If student use the provided Practical Training Report Template file (in **.dotx** format) from CSC339 Google Site, the List of Figures is automated, and will update accordingly.

3.3.3.3. List of Symbols, Abbreviation or Nomenclature

If necessary, these lists appear after the lists of tables and figures. This list is paginated in roman numeral consecutively from the preceding page.

3.3.4. Abstract

An abstract must give a brief statement of the research problems, aims of the research, methodologies used, and a summary of the finding in the context of the shole study. The abstract should not exceed 300 words and should be placed immediately before Chapter 1. This abstract is paginated in roman numeral consecutively from the preceding page.

3.4. Main Body (CHAPTERs)

The main body (CHAPTERs) is the main contents of the Practical Training Report. The main body (CHAPTERs) section differs from the preliminaries section of the report mainly at the page numbering. The page number for main body (chapters) restart at 1 and uses numbering of ‘1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11...’

The details of main body are discussed in CHAPTER 4: MAIN BODY OF PRACTICAL TRAINING REPORT.

3.5. Closing Section

Practical Training contents following the Main Body (Chapters) section is called the closing section. The page number for closing section continues the page numbering from the preceding main body (chapters) section.

Within this section are usually the **References** and **Appendices**.

3.5.1. References

The references section is where all materials used as reference during the writing of Practical Training Report are listed. The references should be written using **American Psychological Association (APA) style only**.

Any report which makes use of other researchers' works, either in direct quotation or by reference, must contain a 'References' section listing these sources.

This section begins on a new page bearing the heading REFERENCES. The list of references begins four (4) spaces below the heading and is double-spaced between entries but single-spaced with each entry. A three (3) space indentation should be used for entries exceeding a single line.

Students are advised to use software like Mendeley or EndNote X to help in managing list reference materials and formatting.

3.5.2. Appendices

This section may contain supplementary illustrative materials such as original data, questionnaires, formulas, quotations, etc that are too long for inclusion in the text or not immediately essential to the understanding of the subject. A description of lengthy experimental methods or the list of names of participants may be included.

This section is separated from the preceding material by a separator sheet bearing the heading APPENDICES (or if there is only one, APPENDIX). This sheet is numbered but not paginated.

This section may be divided into Appendix A, Appendix B, and so on. Each appendix with its title should be listed separately in the Table of Contents as first order subdivision.

For the Practical Training Report, the Practical Training Logbook must be included as Appendix A. Subsequent appendices can be inserted to include additional information, figures or tables as needed. Figures and tables in Appendix must be captioned, but not numbered.

3.6. Arrangement of Sections

The Practical Training Report should be arranged as in Table 3.1.

Table 3.1 Arrangement of sections of Practical Training Report

No.	Item	Remarks
1	Cover page	Coloured cover page for Fakulti Sains Komputer Dan Matematik. Not Paginated.
2	Title page	Not paginated, but counted as 'i'. Not listed in the Table of Contents.
3	Approval page	Paginated as 'ii'. Not listed in the Table of Contents.
4	Acknowledgement	Paginated (continuing lower case Roman numeral from preceding page). Listed in the Table of Contents.
5	Table of Contents	Paginated (continuing lower case Roman numeral from preceding page). Listed in the Table of Contents.
6	List of Tables	Paginated (continuing lower case Roman numeral from preceding page). Listed in the Table of Contents.

7	List of Figures	Paginated (continuing lower case Roman numeral from preceding page). Listed in the Table of Contents.
8	Main Body	Paginated (Start with page number 1). Listed in the Table of Contents The chapters of the main body should contain Chapter 1: Introduction to Practical Training Chapter 2: Organisation Background Chapter 3: Projects Chapter 4: Discussion Chapter 5: Conclusion and Suggestion
9	References	Paginated (continuing page numbering from preceding page). Listed in the Table of Contents.
10	Appendices	Paginated (continuing page numbering from preceding page). Listed in the Table of Contents The Practical Training Logbook should be inserted into Appendix A.

CHAPTER 4: MAIN BODY OF PRACTICAL TRAINING REPORT

4.1. Structure of Practical Training Report

The main body of the Practical Training Report should be divided into several chapters. The suggested chapters are

- CHAPTER 1: INTRODUCTION TO PRACTICAL TRAINING
- CHAPTER 2: ORGANISATION BACKGROUND
- CHAPTER 3: PROJECTS AND TASKS
- CHAPTER 4: DISCUSSION
- CHAPTER 5: CONCLUSION AND SUGGESTION

Additional Chapters can be added if necessary.

4.2. Introduction to Practical Training (Chapter 1)

In the first chapter, students are supposed to introduce the course CSC339 Practical Training. The CSC339 is a compulsory course for CS110 Diploma in Computer Science Programme at Universiti Teknologi MARA Sarawak Branch.

Students should only explain about the Practical Training course in this chapter. Students may mention the name of the organisation they are attached at for Practical Training, but do not discuss about the organisation in Chapter 1.

4.3. Organisation Background (Chapter 2)

In this chapter students are supposed to discuss and elaborate the background of the organisation they are attached at. Students are advised to consult their Industry Supervisor for suitable contents to be included in this chapter.

For organisations that is further divided into several departments, students should also elaborate about the department they are attached into after the organisation background. For students attached at a branch of an organisation, students should elaborate the organisation background in general, and the branch background in more detail.

Table 4.1 Organisation background to be discussed based on the structure of organisation

Organisation attached	Background information to discuss
Single organisation without branch and internal departments	Organisation background in general
Organisation with internal department	Organisation background in general and department background
Branch of an organisation without internal departments	Simple organisation background with Branch background in more detail
Branch of an organisation with internal departments	Simple organisation background with Branch background in more detail and department background

Students may include the organisational chart or organisational structure, vision and mission of organisation, operating hours of organisation, location of organisation, etc. in this chapter if available.

4.4. Projects and Tasks (Chapter 3)

All main projects and miscellaneous tasks assigned to the students should be discussed in this chapter. Refer to the Google Site for CSC339 UiTM Sarawak Branch (<https://sites.google.com/uitm.edu.my/sarawak-csc339>) for the list of suitable projects. Tasks that are not listed as suitable projects should be listed as miscellaneous tasks.

All projects and tasks descriptions should be properly organised into suitable subsections within in this chapter. For all assigned projects and tasks, students should discuss the following.

- Introduction
- Problem statement
- Project Objective
- Project scope and requirements
- Tools used (hardware & software)

- Project planning
- Project analysis and design
- Project implementation
- Project testing
- Results and discussion

Students are advised to record the implementation of all projects and tasks in photos or videos. The photos can be included in the Practical Training Logbook and Practical Training Report; whereas the videos can be included in the Practical Training Presentation.

4.5. Discussion (Chapter 4)

In this chapter students are supposed to discussed about the new knowledge, skills, experiences and other benefits that is gained during the Practical Training at the organisation. Students may discuss on how the new knowledge, skills, experiences and other benefits enhances their understanding of courses taken during their study in Diploma in Computer Science. Students may also discuss on how the new knowledge, skills, experiences and other benefits changes their perspective in the field of computer science or any other fields.

4.6. Conclusion and Suggestion (Chapter 5)

This this final chapter, students are supposed to conclude their Practical Training Report. When concluding the Practical Training Report, students may briefly describe the benefits they have gained from the assigned project/tasks and from the Practical Training in general.

Students should be able to provide some suggestion on how to improve the Practical Training course in the future.

4.7. Writing Convention

4.7.1. Use of English Language

The English Language should be used for all texts in the Practical Training Report, unless when quoting texts from a different language or when referring to official name in Bahasa Melayu such as the official names of government departments, etc.

The style of English used in the Practical Training Report should be consistent and should not mix between British English and American English. The use of *British English is recommended*.

4.7.2. Numbers

Spell out all numbers less than ten (10), and write the single-digit number inside bracket after the spelled-out number (e.g. six (6)).

However, single-digit numbers may not be spelled-out when

- The numbers are part of a series of numbers (e.g. *the children were aged 2, 6, 7, 12, and 13*; e.g. *The standard deviation for each group are 3, 4 and 15 respectively*).
- The numbers are attached to units measured (*8 cm, 25 litres, 27 hectares*, etc.).

Use numerals for double (or more) digit numbers.

If a sentence begins with a number, spell out the number in words and write its numeral inside bracket (e.g. *Fifty one (51) people survived the calamity*).

4.7.3. Units of Measure

Use internationally recognised abbreviation for units of measure.

- 4.6 metric tonnes/hectare (4.6 mt/ha)
- 500 parts per million (500 ppm)

- 25 millilitres (25 ml)
- 31.6 metric tonnes (31.6 mt)
- 15 kilograms (15 kg)
- 37 kilometres per hour (37 km/h or 37 kmh⁻¹)
- 15 grams (15 g)
- 2.5 hectares (2.5 ha)
- 200 kilopascals (200 kPa)
- 167 kilowatt-hours (167 kWh)
- 300 milliampere-hours (300 mAh)
- 450 US Dollars (USD 450)

The numbers before the units measured should not be spelled out, unless they appear at the beginning of a sentence.

4.7.4. Direct Quotation (If Applicable)

Direct quotations must be minimised at all times, except in some fields such as literature (e.g. quotations from Shakespeare). Should a report written in English quote materials directly in another language (e.g. Bahasa Melayu), students are expected to provide a direct translation, and whenever possible, must synthesise materials in other languages and paraphrase them in their own words. Quotations should be *italicised* and positioned within quotation marks "...".

If the quotation is more than two (2) lines, it should be indented and separated from the main text.

CHAPTER 5: HOW TO USE THE TEMPLATE

5.1. Practical Training Report Template in .dotx

A template for the Practical Training Report is provided in **.dotx** format. Microsoft Office Word should be used for preparation and formatting of the Practical Training Report. Use of other word processing software other than Microsoft Office Word (e.g.: WPS Office, LibreOffice Writer or Google Docs) to open the **.dotx** file cannot guarantee full functionalities of the automated features included in the Practical Training Report Template.

The **.dotx** format was developed, optimised and maintained by Microsoft to utilise all features available in Microsoft Office Word software. All UiTM students are provided a Microsoft account license to legally install and use all software in the Microsoft 365 suite, including Microsoft Office Word, Microsoft Office Excel and Microsoft PowerPoint.

Open the Practical Training Report Template **.dotx** file and save it as a new name in **.docx** format.

5.2. Page Setup and Page Margin

The Practical Training Template **.dotx** file already applied the page setup and page margin settings according to the specifications in CHAPTER 2: of this guideline.

5.3. Preliminaries

5.3.1. Cover Page, Title Page and Approval Sheet

Update the organisation details, student details and dates on the cover page and title page. Update the approval sheet with the correct information of the Academic

Supervisor. Student's Academic Supervisor will put their signature and date on this approval sheet after he/she is satisfied with the quality of the Practical Training Report.

5.3.2. Acknowledgement

Replace the sample acknowledgement with student's own texts to express gratitude and appreciations to any person or entity that had rendered assistance to student during the Practical Training period.

5.3.3. Table of Contents

The Practical Training Template.dotx. file will automatically update the table of contents based on the contents added by the students, as long as students use the correct "Style" for all headings/subchapters. To update the table of contents, right click and select Update Field as shown in Figure 5.1 and select "Update entire table" to update the table of content automatically.

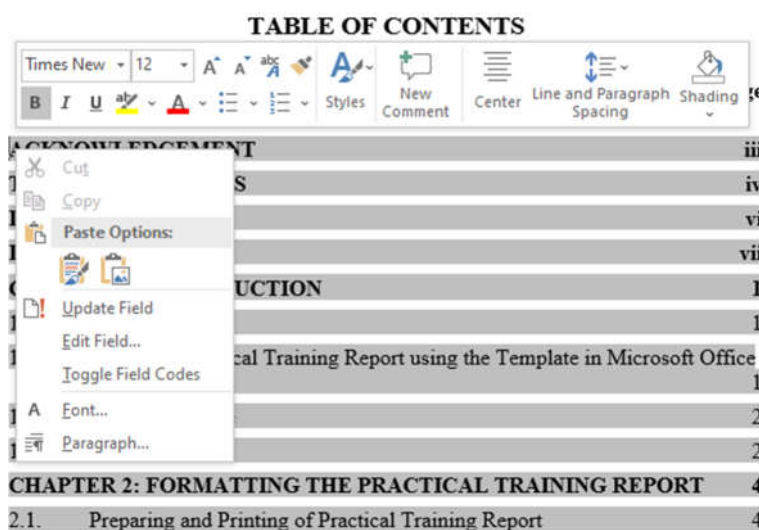

Figure 5.1 Right-click on the Table of Contents and click Update Field.

5.3.4. Lists of Tables and Figures

The Practical Training Template.dotx. file will automatically update the List of Tables based on the table captions added by the students, as long as students use the correct "Style" for all table captions. To update the list of tables, right click and select Update

Field as shown in Figure 5.2 and select “Update entire table” to update the table of content automatically.

The Practical Training Template.dotx. file will automatically update the List of Figures based on the figure captions added by the students, as long as students use the correct “Style” for all figure captions. To update the list of figures, right click and select Update Field as shown in Figure 5.3 and select “Update entire table” to update the table of content automatically.

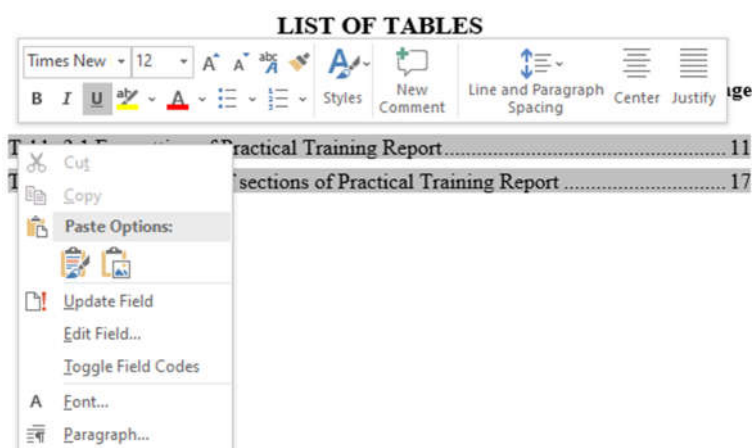

Figure 5.2 Right-click on the List of Tables and click Update Field.

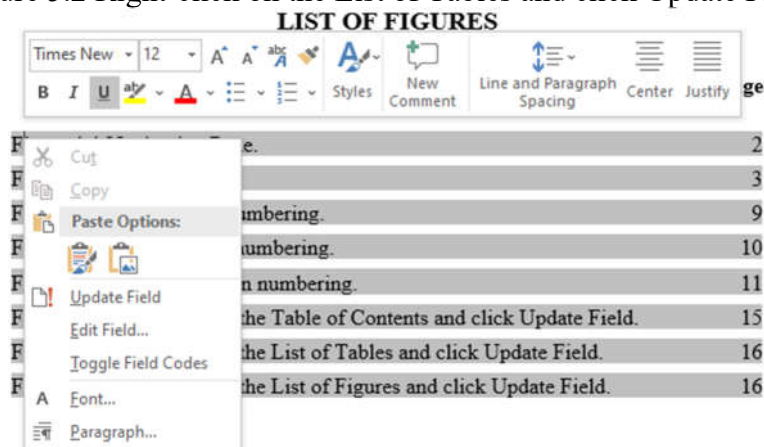

Figure 5.3 Right-click on the List of Figures and click Update Field.

5.4. Main Body (Chapters)

The Practical Training Template.dotx. file uses the Headings, styles and automated features of Microsoft Office Word to help organise the Practical Training Report and provide some automation especially for generation of table of contents, and lists of

tables and figures. Proper use of these Microsoft Office Word features will help students prepare and format their Practical Training Report to meet the requirements.

Students should also use the Navigation Pane and the Styles Pane of Microsoft Office Word shown in CHAPTER 1: to help with the preparation and formatting of their Practical Training Report.

5.4.1. Chapter Headings and Subheadings

The “Heading 1” style should be used for the Chapter titles. The “Heading 1” style will automatically number the chapters accordingly. The “Heading 2, Heading 3 and Heading 4” style should be used for subheadings to mark the subdivisions within a chapter. “Heading 2” style will apply numbering in “5.1”; “Heading 3” style will apply numbering in “5.1.1”; “Heading 4” style will apply numbering in “5.1.1.1”. The “Heading 2, Heading 3 and Heading 4” style will automatically number the chapter’s subdivisions according to its level of subdivision.

The chapter titles, subheading titles and page numbers will be listed in the Table of Contents after student update the field for the table of content as shown in Section 5.3.3.

5.4.2. Contents in the Main Body (Chapters)

Replace the texts in the Practical Training Report Template .dotx file with student’s own contents, tables, figures, equations, etc.

The “C Body Texts” style should be used for correct formatting of normal text in the Practical Training Report. The “C Bullet and Number Text” style should be used for bulleted or numbered lists in the text, so that the spacing for bulleted and numbered lists is correct.

- The “C Body Texts” style applies the double-spacing between paragraphs.
- The “C Bullet and Number Text” style do not apply the double-spacing between paragraphs.

5.4.2.1. Tables and Table Captions

The Practical Training Template has examples of table and table caption, with the correct formatting. Students can copy the table and its table caption to be inserted into their Practical Training Report. Students then can change the example table with their own table, and change the table caption to suitable description. The table number will update accordingly after students highlight it, right-click and choose “Update Field”, as shown in Figure 5.4

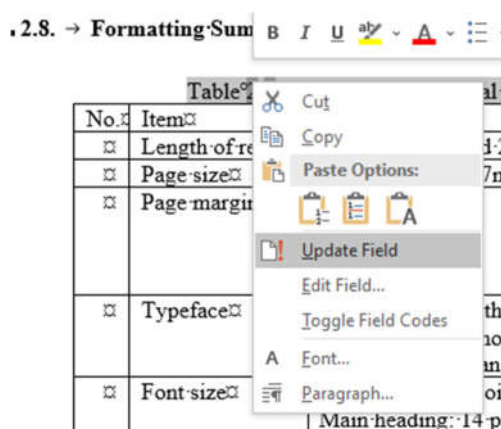

Figure 5.4 Update table numbering.

5.4.2.2. Figures and Figure Captions

The Practical Training Template has examples of figure and figure caption, with the correct formatting. Students can copy the figure and its figure caption to be inserted into their Practical Training Report. Students then can change the example figure with their own figure, and change the figure caption to suitable description. The figure number will update accordingly after students highlight it, right-click and choose “Update Field”, as shown in Figure 5.5.

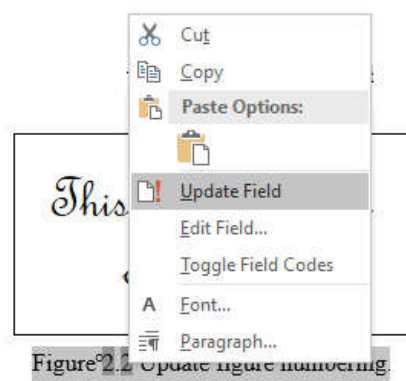

Figure 5.5 Update figure numbering.

5.4.2.3. Equations

Equation (5.1) shows an example of how an equation and equation numbering should appear in the Practical Training Report.

$$y = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a} \quad (5.1)$$

The Practical Training Template has one (1) example of equation, with the correct formatting, that students can copy to be inserted into their Practical Training Report. Students then can change the example equation with their own equation. The equation number will update accordingly after students highlight it, right-click and choose “Update Field”, as shown in Figure 5.6.

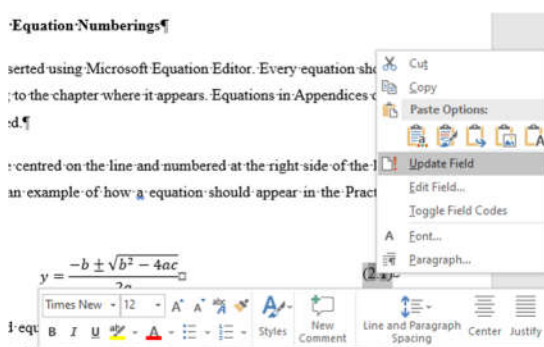

Figure 5.6 Update equation numbering.

5.5. Closing section

The closing section is comprised of the references section and the appendices.

5.5.1. References

The Practical Training Report Template listed sample references written according to **American Psychological Association (APA) format**. Replace the sample references with student's own list of references in correct **APA format**.

5.5.2. Appendices

The Practical Training Report Template includes some sample appendices as guides for students. Replace the sample appendices with student's own appendices. Student's Practical Training Logbook should be included as Appendix A. Other additional details or contents can be inserted into the subsequent appendices.

CHAPTER 6: SUPERVISION AND ASSESSMENTS FOR CSC339 COURSE

6.1. Supervision

Every Practical Training student will be supervised by two (2) supervisors, namely one (1) *Industry Supervisor* and one (1) *Academic Supervisor*. However, for student that is undergoing Practical Training at UiTM, the student might be supervised by one (1) UiTM lecturer or UiTM staff as *Industry Supervisor* and another UiTM lecturer as *Academic Supervisor*.

The Industry Supervisor is mainly responsible for

- Supervising the student on the assigned projects and tasks.
- Providing feedbacks to the student based on the performance of the projects or tasks.
- *Assessing the performance of the student using the assessment form provided by UiTM.*

The Academic Supervisor is mainly responsible for

- Supervision and advise on the student regarding the project or tasks assigned to the student by the organisation.
- Supervision on the writing of Practical Training Report and Logbook.

6.2. Assessment components

Students will be assessed based on 4 items, namely the Project during Practical Training, individual Practical Training Report, individual Practical Training Logbook and Practical Training Presentation. These items will be assessed by the Industry Supervisor and Practical Training Examiner according to Table 6.1. Assessment forms

will be provided to the Industry Supervisor and Panel of Practical Training Examiner by CSC339 Practical Training Coordinator/WFLP for assessments.

Table 6.1 Assessor for CSC339

No.	Assessment Component	Assessor
1	Project during Practical Training	Panel of Examiner
2	Practical Training Report	Panel of Examiner
3	Practical Training Logbook	Industry Supervisor
4	Practical Training Presentation	Industry Supervisor and Panel of Examiner

The Project during Practical Training, Practical Training Report, Practical Training Logbook and Practical Training Presentation are *assessed **individually** for every student*. For students attached to the same organisation, multiple students may share the same projects or tasks, but each student must be aware of the specific modules/sub-tasks that they are working on within the shared project. **Students that share the same projects or tasks are not allowed to share the same logbook, report or presentation.**

Students must not plagiarise the content of logbook or report from another student.

6.2.1. Project during Practical Training and Presentation at UiTM

The organisation or Industry Supervisor **must** assign at least 1 project to every Practical Training student. This project should be related to the field of Computer Science, Multimedia, Computer Network, IoT, etc. Some suggested suitable projects are listed in the CSC339 Google Site.

The descriptions of the projects must be included in the Practical Training Report. The Practical Training Report must be completed by Week 20 of Practical Training (**24 July 2024**) for assessment.

The Project during Practical Training will be assessed by the Panel of Practical Training Examiner based on the following criteria:

Table 6.2 Assessment criteria for CSC339 Project

No	Assessment Criteria
1	Project development flow <i>Demonstrate complete development flow that is linked to project objective, project planning and project design.</i>
2	Project reliability <i>The project has no errors and can be successfully executed.</i>
3	Ability to use software and tools <i>Efficient use of suitable software and tools to solve problems.</i>
4	Problem solving ability <i>Demonstrate that the project effectively solves the problem at hand.</i>
5	Presentation skills/deliverables <i>The presenter speaks clearly and loud enough, with appropriate body language and eye contact.</i>
6	Presentation Q&A <i>The presenter responds effectively to audience reactions and questions.</i>

Criteria 5 and 6 for CSC339 Project assessment also mean that students need to conduct a presentation regarding their project and tasks to the Panel of Examiner. The content of the Practical Training Presentation should be based on the contents in the Practical Training Report.

6.2.1.1. Formatting for Practical Training Presentation at UiTM

The Practical Training Presentation will be conducted via Cisco Webex or Google Meet as part of assessment of Project during Practical Training. The Practical Training Presentation at UiTM will be conducted during **week 21** of Practical Training. CSC339 Practical Training Coordinator/WFLP will arrange the presentation schedule and instructions for the presentation at UiTM. Students are not required to travel to UiTM for the Practical Training Presentation at UiTM.

Students should prepare for the presentation to describe the projects or tasks performed during the Practical Training, and what they learnt throughout the Practical Training duration.

6.2.2. Practical Training Report

Students must write a Practical Training Report during Practical Training. Students should consult their Industry Supervisor and Academic Supervisor for suitability of

the contents included in the Practical Training Report. **Certain organisations may not want to release confidential information of the organisation.**

The Practical Training Report must be completed and submitted during Week 20 of Practical Training (**24 July 2024**) for assessment.

The Practical Training Report will be assessed by the Practical Training Examiner based on the following criteria:

Table 6.3 Assessment criteria for CSC339 Report

No	Assessment Criteria
1	Report format and grammar <i>The report is formatted according to the template. Use of proper sentences and grammar.</i>
2	Introduction <i>Introduction is excellently written with detailed explanation.</i>
3	Organisation background <i>Organisation background is excellently written with detailed explanation.</i>
4	Project planning (Knowledge and skills in leadership) <i>Project is excellently planned with clear understanding and knowledge regarding the project.</i>
5	Project analysis and design <i>Excellent analysis and design of the project is provided in the report.</i>
6	Project implementation <i>Excellent flow of the project's development and implementation is provided in the report with clear descriptions supported with photo or figures.</i>
7	Project testing <i>Complete and clear testing approaches is presented. Proper tables/figures are provided to support the project task.</i>
8	Result and discussion <i>Complete and clear discussion of the results obtained. Conclusion complete and linked to the objective.</i>

6.2.2.1. Formatting for Practical Training Report

This Practical Training Report Guideline (.pdf file) and the Practical Training Report Template (.dotx file) are provided in the CSC339 Google Site. CHAPTER 2:, CHAPTER 3: and CHAPTER 4: of this Practical Training Report Guideline (.pdf file) describes the formatting for the Practical Training Report. CHAPTER 5: of this Practical Training Report Guideline (.pdf file) describes how the use the Practical Training Report Template (.dotx file) to prepare the report.

The provided Practical Training Report Template (.dotx file) is already formatted according to the requirements specified in this Practical Training Report Guideline (.pdf file). The sections and subsections in the Practical Training Report Template (.dotx file) are for example only, students may modify the sections and subsections of the report if necessary.

6.2.3. Practical Training Logbook

Students must update their Practical Training Logbook (in softcopy or hardcopy) every working day. Students should include photos in the Practical Training Logbook to help explain the tasks performed during the day. The Practical Training Logbook must be approved by the Industry Supervisor **every week**.

Students should consult their Industry Supervisor and Academic Supervisor for suitability of the contents included in the Practical Training Presentation. **Certain organisations may not want to release confidential information of the organisation.**

The Practical Training Logbook will be assessed by the Industry Supervisor based on the following criteria:

Table 6.4 Assessment criteria for CSC339 Logbook

No	Assessment Criteria
1	Logbook organisation. <i>Able to record daily tasks/activities in a well-ordered manner.</i>
2	Ability to translate daily tasks. <i>Able to correctly convey the descriptions of the daily tasks/activities in the logbook.</i>
3	Writing skills. <i>Able to record the daily tasks/activities using proper language and grammar.</i>
4	Overall content <i>The content of the logbook in general.</i>
5	Work responsibility <i>The logbook checked by the industry supervisor every week or from time to time. Able to perform the assigned tasks and exceed the expectation.</i>

6.2.3.1. Formatting for Practical Training Logbook

A template for the Practical Training Logbook is provided at the CSC339 Google Site. Students may fill in the logbook in either hardcopy or softcopy according as requested by the Industry Supervisor.

Students are encouraged to add sketches, diagrams, photos, tables or other visual aids into the logbook entries to assist in explaining the assigned tasks. Students that had taken sick leaves must record the sick leave in the logbook and attach a copy of the medical leave certificate as proof.

The logbook needs to be appended into the Practical Training Report. Therefore, for students that chose to have the logbook in hardcopy, they need to scan the hardcopy logbook using a proper scanner. The scanned logbook then need to be appended into Appendix A of the Practical Training Report; for students chose to have the logbook in softcopy, they need to copy the logbook and append it into the Practical Training Report.

Addendum for students that need to undergo COVID19 Home Isolation and Surveillance Order by KKM via MySejahtera app: students should record the quarantine leave in the logbook and attach the quarantine order as proof. However, students are allowed to work from home during the quarantine, depending on the arrangements by the organisation.

6.2.4. Practical Training Presentation at Organisation

Students must conduct a Presentation of their progress during Practical Training to their Industry Supervisor and other officers of the organisation. Students should consult their Industry Supervisor and Academic Supervisor for suitability of the contents included in the Practical Training Presentation. **Certain organisations may not want to release confidential information of the organisation.**

The content of the Practical Training Presentation should be based on the contents in the Practical Training Report, i.e. Introduction about CSC339 Practical Training,

organisation background, projects and tasks during Practical Training, discussion and reflection, and conclusion and suggestion.

The Practical Training Presentation will be assessed by the Industry Supervisor based on the following criteria:

Table 6.5 Assessment criteria for CSC339 Presentation

No	Assessment Criteria
1	Knowledge. <i>Accurate knowledge and information regarding Practical Training, tasks and projects.</i>
2	Communication skills. <i>The presentation is imaginative and affective to convey ideas to the audience.</i>
3	Use of visual aids. <i>The presentation includes appropriate and easily understood visual aids. The presenter refers to the visual aids at appropriate moments.</i>
4	Presentation skills/deliverables. <i>The presenter speaks clearly and loud enough, with appropriate body language and eye contact.</i>
5	Responds. <i>The presenter responds effectively to audience reactions and questions</i>

6.2.4.1. Formatting for Practical Training Presentation at Organisation

The Practical Training Presentation should be conducted at the organisation. The student should arrange for a suitable time with their respective Industry Supervisor for the presentation. The Practical Training Presentation can be conducted at any time before or during week 20 of Practical Training (**26 July 2024**).

Students should prepare for the presentation to describe the projects or tasks performed during the Practical Training, and what they learnt throughout the Practical Training duration.

CHAPTER 7: CONCLUSION AND SUGGESTION

7.1. Conclusion

Hopefully that this Practical Training Report Guideline (.pdf file) and Practical Training Report Template (.dotx file) will be beneficial to students and supervisors when preparing and formatting the Practical Training Report.

7.2. Suggestions

Please consult the Academic Supervisor or CSC339 Practical Training Coordinator/WFLP if some information is missing from this guideline. This guideline will be updated from time to time if necessary.

PANDUAN

Guidelines

Buku ini berfungsi sebagai buku rekod mingguan.

This book functions as a weekly record book.

Tanggungjawab Pelatih

Trainee's Responsibility

Pelatih bertanggungjawab untuk mengemaskini buku ini dengan mengisi butiran yang diperlukan di halaman yang disediakan.

A trainee is responsible to update this book by filling in the details needed in the spaces provided.

Dalam proses merekod, pelatih bertanggungjawab:

In the process of recording, a trainee is responsible to:

1. Mengadakan perbincangan dengan Pegawai Latihan/Penyelia Industri
Consult the training officer/industry supervisor
2. Memastikan buku ini sentiasa berada di tempat kerja dan dikemaskini semasa menjalani latihan
Make sure this book is available and updated all the time.
3. Merekod tugas harian untuk **diperiksa oleh Pegawai Latihan/Penyelia Industri secara mingguan**
*Prepare record of daily routines to be **checked by the training officer/ industry supervisor on weekly basis.***
4. Memastikan semua catatan kecuali lakaran menggunakan pen hitam atau biru.
Make sure all notes except sketches are done in black or blue ink.
5. Setelah tamat menjalani latihan, buku ini hendaklah diserahkan kepada Penyelia Industri dan Penyelia Akademik untuk tujuan penialaian.
Upon completion of training, this book must be surrendered to the Industry/ Supervisor and Academic Supervisor and for the purpose of assessment.

KANDUNGAN*Contents*

Buku log ini perlu mengandungi maklumat:

This log book must contain:

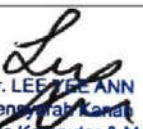

1. Gambaran yang padat tentang setiap lokasi latihan dan kerja yang diamanahkan.
Comprehensive description of every training location and work entrusted.
2. Lakaran yang bersesuaian, data dan rajah litar.
Relevant sketches, data and circuit diagram.
3. Rujukan pada buku teks, piawaian dan maklumat teknikal lain yang berkaitan dengan kerja yang dijalankan.
Text books reference, standards and other technical information related to work done.
4. Komen membina di atas kerja yang sedang dijalankan dan pendapat pelatih terhadap latihan.
Constructive comments on the work being undertaken and trainee's opinion of the training.
5. Kandungan buku log ini perlu diisi menggunakan Bahasa Inggeris.
Contents in this log book should be written in English.

Note: this logbook is a softcopy version. Students are allowed extend the table rows below to record all of their daily activities during Practical Training.

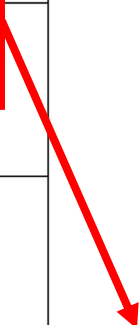

Note: Students can print this logbook if the Industry Supervisor requests for hardcopy version.

The Academic Supervisor must approve the logbook by signing here.

APPROVAL OF ACADEMIC SUPERVISOR

NAME AND SIGNATURE OF ACADEMIC SUPERVISOR	 Dr. LEE YEE ANN Pensyarah Kanan Fakulti Sains Komputer & Matematik Universiti Teknologi MARA
DATE OF VISIT (or via virtual meet)	12 September 2022 12 September 2022

(Academic Supervisor are UiTM lecturers that are assigned to each student for supervision of report writing and presentation)

DATE	<u>PRACTICAL TRAINING WEEK 1</u> ACTIVITY	SIGNATURE OF INDUSTRY SUPERVISOR
11 SEP 2022 (SUN)	-Reminder: Students are required to submit the [BLI-04] Borang Laporan Diri and to fill in the Borang Maklumat Pelajar Latihan Praktik in Google Classroom.	
12 SEP 2022 (MON)	0800: Report for duty at	
13 SEP 2022 (TUE)	The Industry Supervisor must approve the logbook by signing here with official stamp every week.	
14 SEP 2022 (WED)		
15 SEP 2022 (THU)		
16 SEP 2022 (FRI)	HARI MALAYSIA	
17 SEP 2022 (SAT)		

- Reminder: An Industry Supervisor will be assigned by the organization to supervise students.

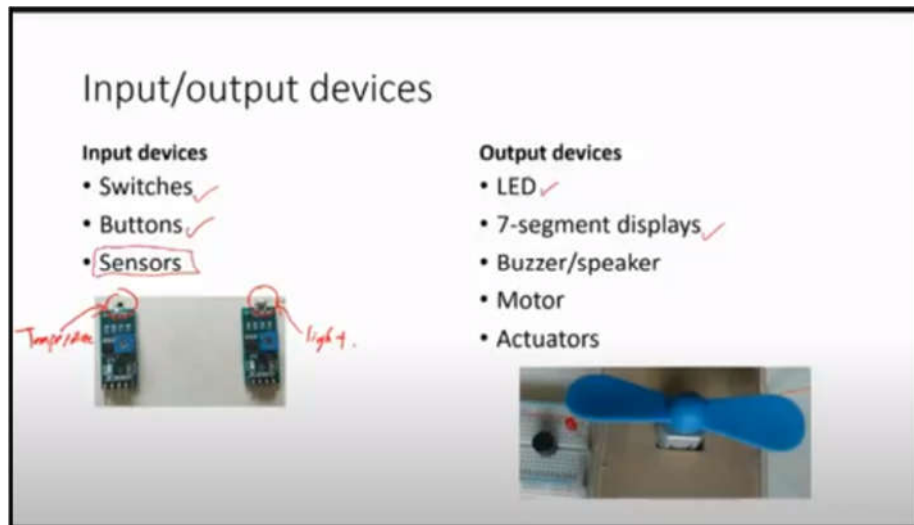

DATE	<u>PRACTICAL TRAINING WEEK 2</u> ACTIVITY	SIGNATURE OF INDUSTRY SUPERVISOR
18 SEP 2022 (SUN)		
19 SEP 2022 (MON)		
20 SEP 2022 (TUE)		
21 SEP 2022 (WED)		
22 SEP 2022 (THU)		
23 SEP 2022 (FRI)		
24 SEP 2022 (SAT)		

The Industry Supervisor must approve the logbook by signing here with official stamp every week.

The logbook attached in Appendix A must be until week 19 of Practical Training.

APPENDIX B: ADDITIONAL FIGURES OR TABLE (OPTIONAL)

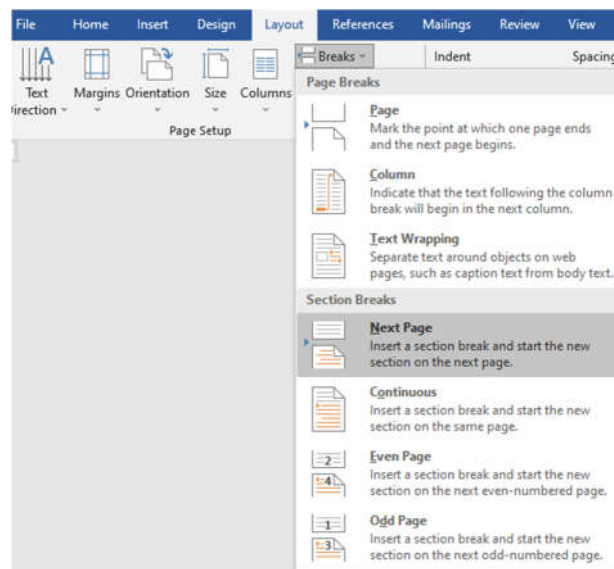

Additional figures that is not included in the main body (chapter) of the Practical Training Report can be inserted in the appendix. Additional figures that help to describe other miscellaneous tasks performed during practical training can be included in appendix.

Additional figures and tables included in Appendix must be captioned, but not numbered.

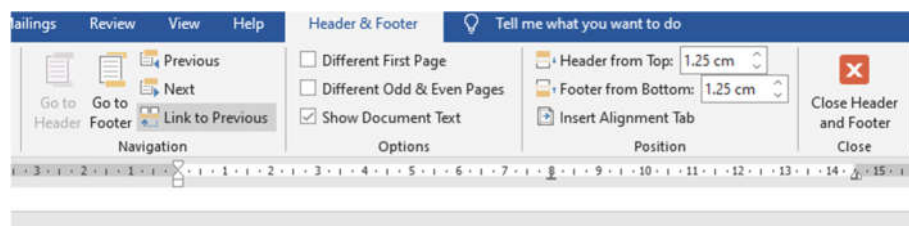

APPENDIX C: HOW TO CHANGE THE APPENDIX LABEL

Use sections breaks to separate appendices into separate sections. Students can only change the appendix label at the top right-hand margin of the page using sections breaks.

Use sections breaks to separate appendices into separate sections.

To change the appendix labels, first, double click the header portion of the page to activate the edit Header/Footer menu. Then deselect the “Link to Previous” option under the Header & Footer tab. Change the appendix labels to match the current appendix page.

Deselect the “Link to Previous” option.
